

We Support Plant Washington!

In a time when we are living through a very difficult economy, Plant Washington is a project that is long overdue for Washington County and this region.

It will bring over 1,500 construction jobs, more than 125 good-paying, full-time positions once operations commence and hundreds more jobs across a broad spectrum of local industries and businesses.

It is an economic engine that will increase revenues across the region and offers a prosperous future for our families and our neighbors.

Plant Washington will be one of the most technologically advanced power plants in the world and will be a model of environmental protection; providing clean, reliable and affordable electricity for generations to come.

We, the undersigned, are proud to be on public record in support of Plant Washington!
