P4G Statement regarding Cobb EMC and Plant Washington

While we are disappointed in the decision of Cobb EMC's board to no longer participate in Plant Washington, we respect their decision. However, this decision does not derail our commitment to successfully develop Plant Washington.

Because we anticipated this might occur due to the political and transitional climate within Cobb EMC, for some time we have been exploring the possibility of bringing in additional partners to help complete the Plant Washington project. While we are not ready to make any announcements today, we hope to announce additional partners in the very near future.

We believe this project is critical for ensuring affordable and reliable energy for consumers in Georgia. POWER4Georgians remains dedicated to developing Plant Washington.
