

Did you know?

- ▶ **Plant Ben Hill would DRY store its by-products, including fly ash and gypsum, in the most advanced, lined storage facility of its kind that will provide maximum protection of the environment.**
- ▶ **Plant Ben Hill WOULD NOT have an ash pond.**

- ▶ **Fly ash can be used in road subbase, Portland cement and concrete blocks.**
- ▶ **Gypsum can be used in wallboards.**
- ▶ **POWER4Georgians' recently permitted Plant Washington was designed with ZERO contact water leaving the plant site – contact water will be stored and used in the plant.**
