

Did you know?

Plant Ben Hill would emit 98% less sulfur dioxide (SO₂) and 90% less nitrogen oxides (NO_x) than coal-fired power plants built in the 1980s.*

To see how we are working towards an energy future with clean, affordable and reliable electricity, visit us at: POWER4Georgians.com

POWER4GeorgiansSM

*Based on SO₂ and NO_x emissions of previously permitted Plant Washington, which is similar to the proposed Plant Ben Hill.
